## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: The examiner suggests to change "the groping" in line 19, page 10 to "the grouping".

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claims 1, 5, and 7, the claim invention recites a maximum likelihood detector for performing a maximum likelihood detection of the demodulated spread signals, the maximum likelihood detector grouping the OFDM-demodulated signals into a predetermined number of blocks to perform the maximum likelihood detection, and using the grouped maximum likelihood detection values to perform a whole maximum likelihood detection. However, those limitations were not described in the specification in such a way as to enable one skilled in the art to which it pertains to make the invention.

Art Unit: 2611

Claims 2-4, 6, and 8 are rejected as incorporating the deficiencies of claims 1, 5, and 7 upon which they depend.
